

Hi. My name is \_\_\_\_\_. We just finished your baby's hearing screen. Your baby passed the screen. This means that your baby's hearing is normal right now. Your baby's hearing is important for his/her speech and language development. If you ever feel that your baby is not hearing you or any sounds, call your doctor right away and request a hearing test.

Here is a brochure that tells you about typical milestones in the development of your baby's speech.

Tips:

- ✓ Have the *Hearing in Infants and Young Children* brochure available
